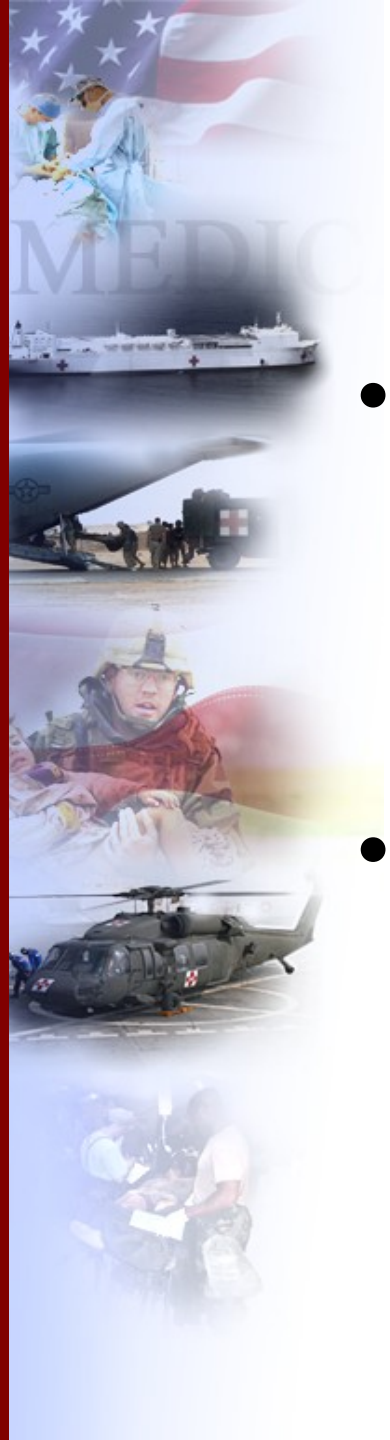
Army Medical Department Center and School

Knowledge Management Division

March 2007

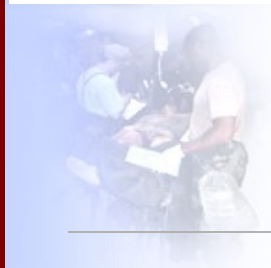
Barbara Erickson, 210-221-7895

Andrew Munoz, 210-221-7380



Purpose

- Provide an overview of the Knowledge Management Division's (KMD's) services and tools.
- Provide POCs and links to enable you to access the KMD services and tools.



"An immense and ever-increasing wealth of knowledge is scattered about the world today; knowledge that would probably suffice to solve all the mighty difficulties of our age, but it is dispersed and unorganized. We need a sort of mental clearing house: a depot where knowledge and ideas are received, sorted, summarized, digested, clarified, and compared."

AMEDD Center & School Mission

The mission of the AMEDD C&S is to train, educate, sustain, and evaluate DoD healthcare personnel to ensure optimal ***health*** and ***readiness***, anytime, anywhere.

Army Medical Department Center and School

Knowledge Management Division

KMD Support for the Mission

Facilitating the Exchange of Useful Knowledge with

- **1-stop information portals**
- **Direct customer service**
  - **Information sharing areas & to**
  - **AMEDD Issue resolution**
  - **Information & technical suppo**
- **Business Process Applications**

How do you plug in to that?

What We Do

Develop and operate an information system that reports real time mission critical data to support decision making for leaders and managers of the AMEDD Center and School and the future DMETC (Defense Medical Education and Training Center).

Organizational Components

- **Digital Dashboard Module:** This part of the application tracks personnel, training, and student personnel information for units in the AMEDD Center and School. The Digital Headquarters connects to several "Legacy" databases to increase data accuracy and integrate your information with Standard Army Systems.
- **Project Tracking Module:** This part of the application tracks ongoing Projects, Issues, and Taskers within your organization and allows users to report and view this information in a concise, clear format. The Project Tracking application also includes Balanced Score Card, Contracting Module, and

MAJ David Marquez
Project Lead
HQ, MEDCOM PA&E
MHS Advances in Medical Practice (AMP)
The Advances in Medical Practice (AMP) program supports insertion of new or emerging technologies in the Defense Health Program (DHP) in order to ensure that the Military Health System (MHS) remains competitive with the private sector in the quality of care it offers DoD beneficiaries. The AMEDD AMP seeks a broad range of clinical submissions. Technologies or advances submitted should be currently available and provide the military an opportunity for improved quality of health care, better access to care, or reduced costs.
For your AMP submission, please use the Generic BCA template provided on this site.
Please contact Ms. Jo Anne Cyr (BCA issues) or COL Theresa Schneider (Clinical Relevance) for assistance.

What is Health Informatics?

Health informatics is the science that underlies the academic investigation and practical application of computing and communications technology to healthcare, health education and biomedical research. This broad area of inquiry incorporates the design and optimization of information systems that support clinical practice, public health and research; modeling, organizing, standardizing, processing, analyzing, communicating and searching health and biomedical research data; understanding and optimizing the way in which biomedical data and information systems are used for decision-making; and using communications and computing

Communities of Practice

CoPs are small groups of individuals who have work experience on similar jobs, specialties, or tasks. They may have a common sense of purpose, or a common interest, and a desire to know what each other knows.

This web site has been developed to help accomplish the mission of a centralized repository for sharing information specific to Health Informatics Education and Training.

Click here to go to our community "HIETW Collaboration" area.

Training Workgroup

A training workgroup has been established to determine the core competencies, tasks, skills, and knowledge necessary to enhance the education, training, and sustainment of clinicians who must be able to take full advantage of technology in order to perform successfully in clinical areas.

The training workgroup is composed of subject-matter experts, to include physicians, nurses, medical researchers, and instructional systems personnel from the DoD, the military services, and academia.

AMEDD Issues Program

You've Got Questions, We Get Answers

- When the pieces just don't fit
- When you need an answer to a pressing issue
- When you've don't know where to find the expertise you need
- When you want information to explore an opportunity

AMEDD Issues Program Presents…

- Consultants ready to respond to your issue
- Almost 2,200 posted solutions — and growing daily
- Database maintained to share the knowledge
- Personalized, efficient, service
- Personal privacy protection

Getting into the System—The Process

- Submit your issue through our automated system:
- Receive acknowledgement within two business days.
- Receive resolution response/POC info within 14 business days.

AMEDD Issues Program - Review Issue (6861)

Issue Number: (6861)
Issue Title: Impact of the New PBD 712 - Military to Civilian Conversions

Discussion: The new Military to Civilian conversion tranformation plan will be making a great impact in our units. What percentage level will TDA units in MEDCOM be filled to? My department is going from 100% down to 50% strength in the next few months and there are currently no soldiers on the gain rosters. Is this the time when we should be requesting to fill our unfilled positions with civilian staff?

Status: Archived as of 04/26/2006

Resolution: You need to check with your Resource Manager at your facility for guidance. FY06 is the first year of implementation for these conversions within the MEDCOM. Funding was provided to all MEDCOM activities for the civilian positions, based upon MEDCOM staff`s estimated series and grade. There was a hold on the filling of the positions from 21 Feb 06 thru 31 Mar 06, however positions can now be filled upon approval from TSG. Each MEDCOM activity, however, may have it`s own process/priority for filling these positions.

Issue Number: (6524) Comment To PI
Issue Title: Combat Lifesaver First Aid Kit

Discussion: The CLS first aid kit doesn`t have the right stuff in it for today`s battlefield. There`s too much of some things and not enough of others.
How can we make changes?

Status: Archived as of 08/17/2005

Resolution: User comments and field experience are quite valuable in developing and refining new products for Soldiers. In fact, AMEDD Combat Developers relied very heavily on "lessons learned" in the operational theater, and also on expert input from the 91W staff in building the new generation of first aid kits.
Certainly the kits are not perfect for every eventuality (and they never could be), but they have been carefully vetted among professionals of many disciplines to support a wide range of uses.
That said, the best way to have your recommendations acted upon is to submit a DA Form 2028. Keep in mind also that if a situation requires a specific medical capability, the Command Surgeon can specify medical items to be carried by troops.

AMEDD Issues Program - Review Issue (6901)

Issue Number: (6901)
Issue Title: Change MOS to 91X?

Discussion: I was out of the Army for five years but recently enlisted into my previous Military Occupational Specialty (MOS) as a 88N30. I would like to know if there is any way that I can switch to 91X (Mental Health Specialist) or a similar field. During the period I was out, I obtained my Master`s Degree in Counseling Psychology as well as several licenses.

Status: Archived as of 05/23/2006

Resolution: This office spoke with MSG Houston, Senior Career Management NCO, AMEDD Personnel Proponent Directorate, (210) 221-9931, about your situation. He said that unfortunately, the AMEDD is currently over strength at E6 and above. Therefore, they are not accepting anyone ranked E6 and above to train for any of the enlisted Military Occupational Specialties. There are currently no provisions for a waiver. You can call him or send him an e-mail message if you have further questions.

AMEDD Issues Program - Review Issue (6864)

Issue Number: (6864)
Issue Title: Is there a Course Dedicated to the Standards of Medical Fitness and Profiles

Discussion: I've heard that there is a course at Fort Sam Houston dedicated to understanding AR 40-501 Standards of Medical Fitness and completing profiles. Is this true?

Status: Archived as of 05/05/2006

Resolution: According to LTC Jose A. Betancourt, Dr.PH, Associate Dean, US Army Medical Department Center and School, 210-221-7399 (DSN 471-7399), there is no course specifically addressing this topic. It is, however, a terminal learning objective for lesson plan number MZOBC0005 linked to the Medical Corps Officer Basic Course track training. "The student will be able to write a profile for the patient described in the scenario, including the necessary elements IAW 40-501 Standards of Fitness".

AR 40-501 Standards of Medical Fitness. Chapter 7 discusses Physical Profiling in detail. See Paragraph 7-11 for Preparation, approval, and disposition of DA Form 3349 Physical Profile.

Issue Title: Precious Metal Inventory (PMI) Question
Discussion: Do gold teeth need to be included in a PMI? If not, are they trash, regulated medical waste, or pathological waste?
Status: Archived as of 12/14/2005
Resolution: "Gold" teeth or scrap metal from crowns are not included in the PMI. Scrap metal from crowns removed from a patient`s mouth are returned to the patient and the dentist makes a note in the dental treatment record signed by both the patient and the dentist that the scrap metal was returned to the patient. If the patient does not want to take possession of the gold tooth, the crown scrap is collected, disinfected, and sent to the Army Dental Laboratory (ADL) at Ft. Gordon, GA. The ADL is able to submit the scrap metal to dental manufacturers who will give a credit toward future metal purchases at the ADL. Not all crowns are high content gold, although the ones made in the Army have this requirement. Since most patients have had work done by someone in private practice, it is impossible for each dental activity (DENTAC) to know the content of metal crowns.

AMEDD Issues Program - Review Issue (6883)

Issue Number: (6883)
Issue Title: AMEDD Approved and Authorized Acronyms for Medical Documentation

Discussion: Is there a list or regulation that covers AMEDD approved and authorized acronyms for medical documentation?

Status: Archived as of 05/24/2006

Resolution: The AMEDD does not publish a comprehensive list of approved and authorized acronyms and abbreviations. Each facility publishes its own list. The Joint Commission on Accreditation of Healthcare Organizations (JCAHO) publishes an Official "Do Not Use" List of acronyms and abbreviations. The facilities take care to exclude these from their lists.

Issue Title: Interservice Physician`s Assistant Program
Discussion: I am interested in transferring from TXARNG AGR to Active duty to take advantage of the IPAP program. DO you have any contacts or do you know if this is possible?
Status: Archived as of 03/02/2006
Resolution: It is strongly encouraged for those who have all academic prerequisites apply for the next Interservice Physicians Assistant Program (IPAP) class. Due to increased operational tempo the Army is increasing its requirement for PAs and applications are low; therefore age and time-in-service waivers being favorably considered like never before. As a result, the chances of being accepted into the program are much improved.
For information on the IPAP, see AR 601-20 The Interservice Physician Assistant Training Program and/or go to the IPAP web site. Scroll down the left-hand column until you find National Guard. Click on it to locate application information. You can find more information at the Army Physician`s Assistant Information web site. The Interservice Physician Assistant Program Manager is CPT James J. Jones, MPAS, PA-C. His phone numbers are 1-800-223-3735 ext. 60386 or (502) 626-0386. The best way to reach him is by e-mail. His e-mail address is ipap@usarec.army.mil.

Issue Title: Assignment/Deployment Questions
Discussion: My permanent change of station orders state Brook Army Medical Center. Does this mean that I will be assigned a hospital/clinical job? Can I be deployed from this type of assignment?
Status: Archived as of 05/30/2006
Resolution: If your orders state assignment to Brooke Army Medical Center, (BAMC) you are being assigned to this trreatment facility. However, your assignment is dependent on Army needs, therefore assignments are not guaranteed, unless there is a reenlistment contract. Your job assignment is also dependent on the unit`s needs. Once you report to the troop command battalion at BAMC you will be briefed as to where you will be assigned within the facility. Any Soldier, unless medically or administratively disqualified, is eligible for deployment. Even though while assigned to BAMC your chances for deployment might be minimized, you are still subject for deployment at any time.

Contact Us
To better serve you, we have provided several options to help you to direct your comments, suggestions, issues, or problem reports to the correct destination.
AMEDD C&S Portal:
To submit your comments, suggestions or feedback on the Center & School Portal, click here to send us your feedback. For technical support or to report an error, please contact the webmaster.
AMEDD C&S Phone Directory:
If you need a telephone number for the AMEDD Center & School Command and Staff, click here or select "Phone Directory" from the navigation menu.
Knowledge Management Division:
The Knowledge Management Division has assembled a group of experts, all with special areas of knowledge, who are available to respond to your questions. You simply submit your issue or question, and we will forward it to the appropriate Knowledge Management staff expert. Your submission will then be posted to our AMEDD Issues Database as a permanent part of our system by DOTMLPF. Visit the AMEDD Issues Program page for more information.
For additional information about the KMD, please visit the Knowledge Management Division Portlet page.
Fort Sam Houston Portal or Exchange Mail:
To report problems, comments, or suggestions concerning External Links on our site please contact the webmaster for that site or call the HELP DESK at (210) 221-6600.
For other organizations and services within Fort Sam Houston call post operator at Commercial: (210) 221-1211, DSN: 471-1211, Toll Free #: 1-800 531-1114.
